Address: 16381 SW Leeding Ln, Tigard, Oregon

EDUCATION

Oregon State University – Bachelor of Science in Computer Science

Sept. 2023 – June 2027

Relevant Coursework – Operating Systems, Data Structures, Intro to Databases, Analysis of Algorithms

SKILLS/ABILITIES

- **Programming Languages:** Python, C/C++, JavaScript, REACT, SQL
- **Libraries/Tools:** NumPy, Pandas, Matplotlib, Git
- **Strengths:** Great problem-solving skills, analytical thinker, fast learner

EXPERIENCE

Library Collection Maintenance Student Assistant, Oregon State University

Mar. 2025 – Current

- Able to quickly adapt and learn my role in the library, whether it's cleaning or organizing books.
- Quickly learned the Library of Congress Classification System to be able to complete my tasks with efficiency.
- Being available to work as a team when needed.

PROJECTS

Stock Market Scraper | Python

- Designed and implanted a terminal-based stock market scraper tool using Python, with web scraping libraries like BeautifulSoup and Requests to gather real-time market data.
- Developed an input system that allows users to search for stock information by entering ticker symbols, with the tool fetching and displaying the relevant data in a structured, user-friendly format.
- Gained hands-on experience with web scraping, data parsing, and real-time data processing, which are key skills relevant to software development in data-driven applications.

K-drama Recommendation Tool | Python

- Designed and implemented a content-based recommendation system using Python, with scikit-learn (TF-IDF and cosine similarity) and pandas to analyze a 350-drama dataset and surface similar titles by genre, tags, and cast.
- Developed a web-based interface with a Flask REST API and a single-page frontend so users can search by drama name or filter by preferences (genres, tags, rating, year), with results shown in a clear, structured layout.
- Gained hands-on experience with recommendation algorithms, REST API design, and full-stack development (Python backend and HTML/CSS/JS frontend), skills relevant to building data-driven and user-facing applications.

CLUBS

Oregon State University Artificial Intelligence Club

Sept. 2024 – Current

- Applied skills in data preprocessing, exploratory analysis, feature engineering, and model building.
- Utilized tools and libraries including Python, Git, NumPy, Pandas, and Matplotlib.
- Collaborated with peers and mentors for feedback, resulting in a portfolio-ready project demonstrating practical AI competencies
